Adapted Projector Lamp Toy Product Handbook

Rev: 1.0

Table of Contents

1. Introduction

1.1 About the Community Partner

Our journey began in 1970 with the will of Mrs Shakuntala Bhatia. Under the banner of the Asian Women's Welfare Association, Mrs Bhatia and her peers, like Mrs Tambyah and Mrs Kula, identified gaps in the community to help the underserved.

The Association incorporated AWWA Ltd on 7 January 2015, a Singapore company limited by guarantee. In April of the same year, AWWA Ltd took over the operations and activities previously managed by the Association. In 2022, the Association was dissolved, and AWWA continues to address social service gaps as they arise, by being guided by our mission and strategic vision.

1.2 Product Description

This table clarifies the intended purpose and scope of the product:

WHY?	Special needs students are often excluded from using toys and/or face lack of appropriate ways to express themselves.
WHO?	For special needs students who are learning to understand cause-and-effect and have fun.
WHAT?	A toy lamp with colourful light and projector star and moon onto the wall and ceiling. Adapted with an additional 3.5mm female mono audio cable to trigger power on/off by other switches.
HOW?	This product transforms an off-the-shelf projection lamp into a durable and responsive toy with a 3.5mm female audio jack so it can be triggered by another adapted switch or button. . It allows students to experience and understand the cause-and-effect.

1.3 Product Overview and Features

1. Adapted Projector Lamp Toy can be connected to an adapted recorder button and turn on/off with audio playback.
2. Adapted Projector Lamp Toy can be connected to an adapted limit switch and turn on/off.
3. Adapted Projector Lamp Toy can be connected to a squeeze or grip switch and turn on/off.

2.1 Set Up Instructions

Use the following table for a step-by-step guide to setting up the product:

Setting up	
Open the battery cover and install 3 AA or 4 AAA batteries. Different models of the toy using different batteries.	
Connect it to an adapted button or switch to turn on/off it.	
Remove the white cover to let it project to the wall and ceiling.	
There are 3 modes on the projector lamp toy. Current adaptation only support Mode B Mode A – White LED on and off Mode B – cycle through RED GREEN BLUE LED and off

Setting up	
Mode C - Rotation on and off	

2.2 Maintenance

1. Remove AA batteries if the Adapted Projector Lamp Toy is not in use to prevent battery leak and corrosion.
2. If AA battery leaks, please change it
3. The device can be wiped clean with a damp cloth. Do not wash or submerge in water.

2.3 Troubleshooting

Problem	Possible Cause	What You Can Try
Projector Lamp toy not working	Battery drain	Change the battery to see if it works
	Battery spoilt because of leakage	Change the battery to see if it works
	Button is malfunctioning because battery leakage has caused the contact points to corrode	Check how bad the corrosion is? 1. If is very bad that it leak to the PCB , please replace the button, 2. If not try to clean up and replace the battery
	Projector Lamp toy faulty because of the solder broken	Open with the assembly instruction and try to check on it or contact EG for support.

3.1 Assembly Guide

Steps	Images
Remove the top white and black cover.	
Remove the battery cover.	

Steps	Images
Remove the battery if there is and unscrew the 4 screws.	
Open up the bottom cover.	

Steps	Images
Drill a hole of 4-4.5mm depending on the size of your 3.5mm audio jack cable.	
Loop through the 3.5mm female audio jack cable and put a cable tie to it.	
Remove the PCB from the slot.	

Steps	Images
Solder the 2 wires from the 3.5mm female audio jack to the pcb middle button. You can solder all the 3 buttons too.	 A close-up photograph of a green printed circuit board (PCB) with three buttons. Two red and black wires are soldered to the middle button. The PCB is mounted on a black plastic housing.
Place back the PCB to the slot properly and don't break the solder.	 A photograph showing the green PCB being inserted into a slot within a black plastic housing. Several blue and red wires are connected to the PCB.
Screw back the 4 screws	 A photograph of the back of a black, circular projector lamp toy. The internal components, including a battery compartment and a PCB, are visible. Four screws are being reattached to the back of the device.

Steps	Images
Install 3 AA batteries and test it with a switch or button.	

4. Credit and Open Hardware Licence

This section provides the required legal notices and attribution for the open hardware design used to create this product.

4.1. Open Hardware Attribution

The core design for this Adapted Protector Lamp Toy is based on the Switch Adapted Moon and Star Projector, an open-source assistive technology project.

- Original Designer: Makers Making Change (a program of Neil Squire).
- Original Copyright: Copyright (c) Neil Squire / Makers Making Change.
- Original Source Location: The original project source files are available online at:

<https://www.makersmakingchange.com/product/switch-adapted-moon-and-star-projector/01tJR000000694HYAQ>

The screenshot shows the Makers Making Change website. At the top, there is a navigation bar with the logo, "Assistive Devices", "Make", "Engage", "Learn", "Clubs That Care", "More", and a search bar. Below the navigation bar is a large section titled "About Makers Making Change" with the subtitle "Empowering people with disabilities since 1984". Under this, there is a section titled "Our Mission" which contains text about the organization's goals and a video player. The video player shows three people working on a project, with a YouTube logo and the text "Watch on YouTube".
